TOOL'S TYPE (game, course, app, LMS, etc)	ame	Video course	presentations	Board game	Tools in general	Moocs	Rol Game	Game	Podcast	cybersecurity.
GENERAL SETTING										
Please provide a brief description of the tool	This is an on-line game for children and adults with three different levels of difficulty.	This is a video for beginners and people that do not have any idea about cybersecurity. There are two more videor related to each other, but thesese are destinated for people that want to be professionals in cybersecurity.	They are videos and presentations of different lengths that help to manage and cope with different situations.	Up to 5 board games that can be downloaded for free, cut out and used freely.	A lots of pedagogical tools for children and parents.	Cybersecurity learning platform of the University of Salamanca and the National Police.	It consists of up to five role-playing games in which an attack scenario is recreated in an SME and includes solutions and recommendations.	It is a game in which helps people to be aware about cibersecurity and do not require previous knowledge.	This podcast is focused on cybersecurity and guided by cybersecurity professionals, but you do not need to be a professional to listen.	These are various about cybersecu collected on a wet where you can asset knowledge in this t
Content inside the tool pr	hising, Passwords, Social Media good ractice, terminology of cybersecurity.	Confents on basic concepts in cybersecurity, Malware and types. Vulnerabilities and types. What is a hadue. Fau.	Good practices and workshops	These games inicude: Criptópolis, about cybersecurity management Tribial de la seguridad, questions about cybersecurity. Detecta el fraude, detect the fraud Datos blindados, data defense. ¿Quién es Quién?, Guess Who?	Good use handbook about th use of Internet, social media, parental control, etc.	Set of courses with a well-defined tiltherary and various levels of knowledge. Different areas of interest and business.	Different scenarios where you will have to face a cybersecurity incident.	Content based on good use of the Internet, secure passwords, how and with whom to share information, identification of harassers and confidentification of harassers are from the social engineering tricks.	Technology	All the aspects about cybersecurity. Phisin fraud, good practice.

There are 3 types of course : e- learning, presentel, webinar	Self regulated	Self regulated		Self regulates
What is the duration time / respectively Session structure of the tool?	single session : few hours; modules or lessons : several weeks or even months	does not have a set duration or session structure	does not have a set duration	training sessions and webiners vary depending on the specific event	varies depending on the specific course or training session	Without limit on the time of each section	We decide the limit			Cybertidu consist different modules, a dutation time for each varies
By which Material components can the user get access to the tool?	computer, tablet, or smartphone with internet access	web browser on their computer or mobile device	web browser on their computer or mobile device	web browser on their computer or mobile device	web browser on their computer or mobile device	Smartphone, computer, it has its own APP				Web browser on a co mobile devic
TOOL DESIGN Does it have tutorials to learn how to use the tool ?	Ase	no	yes	no	yes	yes				yes
Is the tool available for mobile option?	yes	yes	yes	уш	yes	yes				yes
Is an adaption to further languages possible?	yes	no no	yes	no	ro	yes				no
Which languages are currently available?	French, English, and Spanish	french	English, French, Spanish, Portuguese Italian, German, Russian, Chinese, an Japanese	french	french	French, English, Spanish, 40 languages				french
Can trainers see the progress of the user? (if yes, please describe)	yes Trainers can track the progress of their students and see how well they are performing in the training modules	no	feature called "Teams" where trainers can create learns and monitor the progress of team members	provides trainers with tools to monitor user progress and engagement with the platform's content	Trainers can monitor the progress of users in courses and training sessions through the platform.	Yes, the trainers can have reports of each user, percentage of the sections done				no
Does the tool provide feedback to the learner during the learning process?	yes	no	provides feedback to learners during the learning process through its challenges and the solutions provided	include opportunities for learners to ask questions and receive feedback from cybersecurity experts	yes	Yes, the trainers can have reports of each user, percentage of the sections done				no
Does the tool provide feedback to the learner at the end of the learning process?	yes	no	does not provide specific feedback at the end of a learning process, but users can track their progress and achievements on the site.	include feedback at the end of the session, and users can receive certificates of completion for some events	yes	yes				yes provides feed learners at the end module
In which way does the tool offer to connect to other systems?		does not offer specific connections to other systems	not offer specific connections to other systems	does not offer specific connections to other systems	does not offer specific connections to other systems	Any videoconference app. Microsoft, platform CMR Dendreo, wooclap, etc.				
In which way is the tool connected to the social media?		social media buttons on its site, allowing users to share content on various social media platforms	has social media buttons on its site, allowing users to share content on various social media platforms	has social media accounts on various platforms, including Twitter and Linkedin, where it shares news and updates about its events and content.	social media buttons on its website, allowing users to share content on various platforms.	The LMS gives the permission to share the progress of the user				Cybertidu is not con social medi
Which communication options does the tool offer?		does not have a specific communication feature, but users can contact the site administrations through a contact form on the site	does not have a specific communication feature, but users car contact the site administrators through a contact form on the site	provides users with the ability to connect with cybersecurity experts and other users through its webless and training sessions, as well as through its social media platforms.	a chat function for users to contact the support team.	The LMS has the resssage option to contact other users and a trainer				
PRIVACY Is personal data processed? If yes, where is the server location? → should be EU, otherwise adequacy decision ADMODIFY APPLIED.	yes Personal data is processed during the registerion process, but the data is protected by the Franch Data Protection Act server in use		Yea, personal data is processed by Rock-Me. The server location of Rock- Me is in France, which is a member state of the Luopean Union. Therefore, personal data can be transferred and processed in correlation with the EU General Data Protection Regulation (CDPR).	yes server in france	collects personal data through its registration process and other interactions with the platform. The server boaton is in France.	yes Personal data is processed during the registration process and its moves around the serve				yes server in france collects personal dat ernal addresses, bu the purpose of crea account and tracki progress.
ADAPTABILITY Let the format of the tool be adapted or not? Is the tool open source?	Allows for the sharing and adaptation of the material as long as appropriate attribution is glien and the Screan terms are respected	no	100	no.	no.	Yes, we can change the background, the colors, add he logo, add personalised words or names to each trainer.				no
Which regulation and copyrights condition does the tool have?	The content of the platform is protected by copyright and is available under a Creative Commons license	The site's content is copyright- protected and can only be used for personal or educational purposes, not for commercial purposes	proprietary tool, so it is subject to the regulations and copyrights of its creators	proprietary tool, so it is subject to the regulations and copyrights of its creators	proprietary tool, so it is subject to the regulations and copyrights of its creators	The content is protected by the GPL General Public License, it respects the RGDI law of collecting data. It is our task to be sure our content follows the regulations				CyberEdu is owned an by the French Na Cybersecurity Agency (their terms and condit
Can the tool be adapted ? In which way can the tool be adapted for MECyS' purposes?		89				If we want to create only a game we can choose the option of VR Virtual reality				
ANY EURTHER COMMENTS Please provide any estra information or your opinion of the tool according to our needs.						The LMS has pedagogical options such as training activities, evaluation, syrveys, SCORM (sequence of a pedagogical module),				

- Look for a suitable Learning Tool and provide the name in the line 5, the link in line 6	
- Copy and paste the link's tool	
- Then write down the type of the tool	
- Fill out each column by typing a "yes" or "no", when needed by answering the questions	
-For open questions provide a fully answer in your own words. If there is a Non-applicable question for the tool, you can type " - "	

pen questions provide a fully answer in your own words. If there is a No	n-applicable question for the tool you	can type " - "
